

Picture Perfect

Why so serious? I'm gonna make you an offer that you can't refuse. Let's put a smile on your face. And here, we go!

Quoting **Don Corleone** from **Godfather** and **Joker** from **Batman** is my way of letting you know that this problem (may not be a problem for you at all!) is about..... Yes, you got that right!

Movies!! See?? There's that Smile :)

So this is the offer I am going to make...

What you get to work with?

To get you started, a comprehensive list around 9300 movies is at your disposal with their ratings, votes, cast, director, budget, gross, etc.

What we expect from you?

Do you have it in you to come up with the best cast and director a movie could have (each for the top 3 frequently occurring genre) and create your own TOP 10 movies of ALL Time?

Additionally, to really make yourself stand out, identify cool insights from the given data that would get you brownie points

P.S: Data does not lie! Really! It's not a myth anymore. So keeping your pride and prejudice aside, whatever you come up with should be from the given data!
